TALK NO. 11

Through this series of articles we have endeavored to place before you the facts in a fair, interesting way, in order to give you a full understanding of conditions we are operating under today, and in order that we might secure your interest and friendship in our effort to make the street car and lighting system in Corpus Christi a success, we respectfully call to your attention extracts from correspondence between Secretary McAdoo and President Wilson:

"Dear Mr. President:

Our local public utilities must not be permitted to become weakened. Transportation of workers to and from our vital industries and the health and comfort of our citizens in their homes are dependent upon them, and the necessary power to drive many of our war industries and many other industries essential to the war is produced by them."

"I earnestly hope that you may feel justified in expressing the conviction that the vital part which the public utilities companies represent in the life and war-making energy of the nation ought to receive fair and just recognition by State and Local authorities. Cordially yours,

(Signed) W. G. McADOO,"

"My Dear Mr. Secretary

It is essential that these utilities should be maintained at their maximum efficiency and that everything reasonably possible should be done with that end in view. I hope that State and Local authorities, where they have not already done so, will, when the facts are properly laid before them, respond promptly to the necessities of the situation."

(Signed) WOODROW WILSON."
